This has to be the cheapest and best value laundry detergent around.

Ingredients:

1 bar soap, grated

1 cup washing soda (Lectric Soda)

1/2 cup borax

Mix together and store in a sealed container.

Use 3 scant teaspoons per load for a top-loader and 1 scant teaspoon per load for a front loader.

You can use up the small slivers of toilet soap you collect if you like, ordinary bath soap or laundry soap. This recipe is ideal for using up all the leftovers you collect in the family bathroom.

This detergent won't produce masses of suds, but it will get your clothes clean.

Optional:

Give the washing powder an extra boost if you wash really dirty or greasy clothes by adding one small box of bi-carb soda to the mix.
