

Little Hot Houses

This free tip sheet was produced by the Cheapskates Club –
www.cheapskates.com.au

Make your “little hothouses” by cutting the bases off 2 litre PTE soft drink bottles with knife or scissors. Use the cut off base to plant seeds in. Plant out leaf crop seedlings.

Spread chook poo around “little hothouses”

Cover seedlings.

Keep “little hothouses” neatly stacked I screwed the bottom of a 1.25 litre bottle onto a base to support each column.

These instructions and pictures of little hot houses are courtesy of Brian and Adelaide Agate

After 1 or 2 days depending on the weather remove “little hothouses” leaving Chook poo away from plant.
